

PHYSICIAN'S PROFILE

JEFFREY WAESCHE M.D.

PHILOSOPHY

Dr. Jeffrey Waesche's philosophy about hair restoration developed over the many years of experience and refinement of his skills. It espouses the ability to work with the patient to design a new look balanced with expectations, future outcome and the patient's needs. His openness and professional demeanor allows the patient to engage in a participatory session where possibilities are discussed, evaluated and finally accepted based on his in-depth knowledge about hair transplantation.

Dr. Waesche integrates the science of hair restoration with the art of creating an image. He is a dedicated practitioner of PAI Medical Group's trademarked Multi-Unit Hair Grafting™ technique. This exclusive process is practiced in over 14 clinics located throughout North America. Using Multi-Unit Hair Grafting™, Dr. Waesche can transplant more hair in one session than is available with other less cost-effective techniques.

Dr. Waesche has performed thousands of Multi-Unit Hair Grafting™ transplants in numerous states throughout the PAI Medical Group network of clinics for over seven years. His broad exposure to the various conditions of patient's hair, needs, expectations and final results ensures that the patient will confidently expect a superior outcome and satisfaction.
